About U.S. Screen Print & Inkjet Technology

Solutions for Screen Printers Since 1979

U.S. Screen Print & Inkjet Technology (formerly The U.S. Screen Printing Institute) was established in 1979 by leading industry experts, Scott and Pat Fresener. We offer books, videos, DVDs, hands-on workshops, software solutions for screen printers, including *FastFilms*™, the industry's number one color separation program; *FastRIP*™, software that allows film positives to be printed on an inkjet printer, and, the hottest new product in the industry - *Fast T-Jet*™, a complete line of inkjet-to-garment inkjet printer.

The Industry's Leading Internet Site

In 1994 U.S. Screen established *www.ScreenPrinters.Net*. With over 100,000 visits per month and thousands of pages of information, ScreenPrinters.Net is the clear leader in industry websites.

The Best Hands-On Training in the World

Since 1979 the we have had over 12,000 students from around the world attend it's training workshops on screen printing and computer graphics. The 3,000 square foot training center contains the latest screen printing and computer graphics equipment. Classes are taught monthly by a team of award winning industry veterans.

Product Development

The Fresener's know that the key to a stronger industry is through solutions that help printers do better quality work in a more efficient and profitable manner. They are continually developing and testing new products for the industry in their product development research lab.

Excellent Technical Support

We have a reputation for giving excellent technical support for our products and even products made by other companies. The technical support team has extensive computer graphics, screen printing and programming backgrounds and pride themselves on fast response and answers that work!

Experienced, Friendly Sales Staff

The Sales Staff at the U.S. Screen must pass the "friendly" test before they are hired. With over 130 years of combined industry experience, this great group of people helps screen printers decided what is the best product and solution within their budget and do it without high pressure. Our sales philosophy is to make excellent products that people love, and let the products sell themselves.

In-House Video Production

We have a state-of-the-art video production studio that includes the latest in digital editing and video equipment. The studio staff is constantly busy shooting new titles for the industry.

Product Manufacturing

In order to be able to make quick upgrades and changes to products, most of U.S. Screen's products are created in-house - from the Fast T-Jet printers line, to software, DVDs and videotape duplicating.

Same Day Shipping

We offer same day shipping on most products and maintain a large inventory. On any given day, 100 to 150 packages are shipped to destinations around the world from U.S Screen's large, well stocked, warehouse.

A Quick Word About the Freseners

Scott and Pat started in screen printing in 1970 when they began a small garment printing business out of their garage. This business grew to be a large company with automatic equipment and gave the Freseners experience in both technical areas and business management. The lack of standardization and training programs prompted the Freseners to write their books and start giving classes.

Scott Fresener, the Institute's Director, has contributed over 300 articles to industry trade magazines and is a popular guest speaker at major industry trade shows worldwide. Scott has contributed technical articles to the Screen printing and Graphic Imaging Association's *Screen Printing Technical Guidebook* and is the past chariman of SGIA's *Textile Graphics Committee*. He is also the past chairman and a lifetime member of the *Academy of Screen Printing Technology* and for the years 2004 - 2006 is on the *Board of Directors* of SGIA.

The Fresener's two adult children, Mike and Mishelle, are very involved in the business. Mike is the company's jack-of-all-trades and manages video production, the *ScreenPrinters.Net* website, company IT issues, and teaches portions of the classes. Mishelle is Technical Support Manager for *FastFilms*™ and handles all travel arrangements for the large outside installation staff.

The Freseners and the Institute have received dozens of industry awards and are two-time winners of the coveted *Magnus Award* by the Screen printing and Graphic Imaging Association for outstanding service to the industry. They are also two-time winners of *Impressions Magazine's Quest for the Best* award for the best training courses and books in the industry. In 1996, Scott was awarded the *Paumele Award* by the Screen printing and Graphic Imaging Association. This is the highest award you can receive from them and is given for outstanding lifetime service and major contributions to the industry.

The Fine Print

General Terms and Conditions:
All prices and products specifications subject to change without notice. Consult printed or online order form for terms, conditions, and shipping and handling charges. Prices are FOB Tempe, Arizona and are in US dollars. Orders are generally shipped the same-day. COD shipments are charged a $8.50 COD collection fee plus applicable freight. Orders paid by personal or company checks may be held until the check clears the bank.

Discounts are given to Screen Printing Equipment and Supply Companies, Government Agencies, Educational Institutions, Art Stores, Schools and Universities who resell the products or use them for training programs. Call for a Price Schedule.

International Orders:
International orders gladly taken but must be prepaid with a credit card, check drawn on a US bank, money order or wire transfer. Fax the order with a request for total charges including freight. Note that all DVD products are only available in NTSC format (North America). They can be played on any computer but will not play on a DVD player that is not NTSC compatible.

Return Policy:
Books, videos, DVD's, FastPOSITIVE, FastRIP and the Fast T-Jet carry a 30-day moneyback guarantee. Some terms and conditions apply for the Fast T-Jet. A 25% restocking fee will be charged on all returns. Shipping and handling charges are not refundable. For security reasons FastFilms™ is not returnable and is not refundable once the programs have been unlocked in accordance with standard software practice.

FAST T-JET™

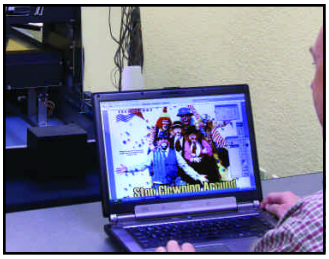
Printing T-Shirts has never been easier!

The *Fast T-Jet* is clearly the leader in inkjet-to-garment printers and technology. From small shops to large factories, we have a machine for you.

Over 3,000 machines sold!

Inkjet directly to garments. It's as easy as 1,2,3.

1. Create Image with Computer Graphics

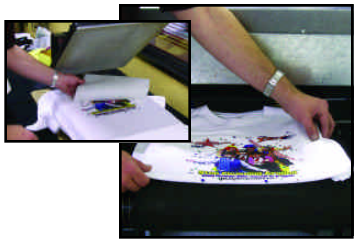


Use customer supplied images, scan from a photo, take a picture with a digital camera, or create graphics yourself with Adobe Photoshop, Adobe Illustrator or Corel Draw (not included). You can also create images using the very powerfull **FastARTIST** included with every T-Jet.

2. Print image in under one minute on the T-Jet.*

The **Fast T-Jet** is very easy to use. Simply load a garment on the shirtholder and press the Load button. The printer does the rest. *Most images print in under one minute on light shirts. Darks shirts and large graphics take a little longer. Dark shirts require a simple pretreatment step.

3. Cure Images with Heat Press or Conveyor Dryer



Print images with our specially formulated **FastINK** for Textiles. **FastINK** is a water-based pigment ink that when properly cured/dried is very durable and washfast. You can use a simple heat transfer press to cure the prints, or a larger conveyor screen print dryer.

Make money. Have happy customers. Have Fun!

The **Fast T-Jet** loves to print full-color images on light AND dark shirts. We have the best white ink in the industry. It is durable and very bright! Print one shirt or hundreds. Charge full retail for short runs. Turn around jobs the same day! Print caps, mousepads, shorts and towels.

- **Easy to use.**
- **Excellent washability for light and dark shirts.**
- **Superb detail...better than screen print!**
- **Print from any graphics program.**
- **Great for name drops!**
- **T-Jet3 is portable for events.**
- **Excellent support - 24/7.**
- **Buy from someone you know and trust. Since 1979.**
- **Print on 100% cotton, 50/50, caps, and more.**
- **Ink costs of 15 to 40 cents per print for light shirts.**
- **Safe, waterbased textile ink - solvent and odor free.**
- **Brilliant color and prints! Very soft hand and feel!**
- **Perfect for individual shirts or production runs.**
- **World-wide dealer network.**
- **The BEST white ink on black shirts anywhere!**

30 Day Money Back Guarantee* No RISK!

Every **Fast T-Jet** carries a *30 Day Money Back Guarantee*.* In order to have a happy Fast T-Jet and be a happy owner, you must agree to read the manual, call immediately if you experience any problems, keep your "baby" in a controlled environment that is not dry or dusty, and do regular simple maintenance.

*Details of this guarantee are available from U.S. Screen Print or from your dealer.
** Except the large T-Jet PRO.

Ask a sales rep for details.

T-JET 3

NEW MODEL!

$16,995.00
Fast T-Jet3 Model SDT-1300

Lease for $300.00 Per Mo.
Five year lease with 10% purchase option.

30 to 70 light shirts per hour.
Production rate with white ink on dark shirts.

Very fast print times, long bed for big images, easy to load shirt holder, brighter white ink, heavy duty bulk ink system, exhaust fans, touch pad controls, print from any graphic program, very robust and Heavy Duty.

MADE IN AMERICA

The entire line of **Fast T-JET**™ printers is revolutionizing garment decorating. No, they won't replace screen printing (yet). They will not lay down a heavy rubbery print for athletic printing and numbering. They won't print puff, glitter or high density.... yet. But, they will print vibrant, washfast prints on white, light and dark shirts **VERY FAST**.

With our **Fast T-JET3**™ you can print a full size 12" x 12" (30.5 x 30.5cm) print in **ONE MINUTE** on a light shirt and under **THREE MINUTES** on a black shirt with white ink! Print a small chest print in **FIFTEEN SECONDS** on a light shirt!

Fast T-JET3™ **SDT-1300** is a small table-top unit that measures 34" W x 40" L and 19" H (63 x 114 x 43cm). It uses four color inkjet technology (CMYK) plus white ink and comes complete with a bulk continuous flow ink system, four 8 oz. starter bottles of FastINK™ TEXTILE colors, 16 oz. of FastINK™ White along with a gallon of special pretreatment for dark shirts. It can print on baseball caps in 30 seconds with a special optional baseball cap holder. It also prints on towels, panties, shorts, mouse pads, bibs, bandanas and more.

The maximum print size is 12.5" x 22" (30.5 x 51cm) with the optional oversize shirt holder. In fact it will print TWO shirts end to end! It also has a laser light sensor to tell if a garment is in the way of the print head. This printer includes a very powerful design/graphics program called FastARTIST (PC/Windows program only). You can create the image in any graphic program (Mac or PC) and bring the image into FastARTIST for output. Or, you can create the entire image in FastARTIST because it is very similar to Corel, Illustrator and Photoshop!

The power of the **FastT-JET** printers is **FastRIP** - magic software that tells the printer how much ink to print, how to print white ink, and has special ICC color profiles to match colors. This machine is great for small and large jobs. With an ink cost of less than 40 cents per shirt (standard print size) and speeds of one to three minutes per normal print, you can get great production! And, how about hooking up two units together and running the machines like an embroidery machine (optional software upgrade).

The new **FastT-Jet3** inkjet garment printer has major improvements over the FastT-Jet2. It prints 30% faster on light and dark shirts, has a longer bed and simple shirt loading feature. It also includes a very robust bulk ink system, and exhaust fans to remove excess ink mist and lint from the print area. ***Best of all it is MADE IN AMERICA (except for the Epson print engine) using aerospace manufacturing technology and standards!***

FastINK™ **TEXTILE** gives you a very washfast print. The finished print needs to be heat set using either a standard heat transfer press or conveyor dryer. Dark shirts with white ink need a simple pretreatment spray application before printing. Small imprintable items are held in place with a youth or infant shirt holder. T-Shirts are held in place by simply laying them on a specially designed shirt holder.

To learn more about production rates, the latest product information and to see a video of the **Fast T-JET**™ in action go to ***www.MyT-Jet.com.***

Includes Fast T-JET3 unit with bulk ink system, standard 13" x 18" (33 x 46 cm) T-Shirt holder, four 8 oz. bottles of FastINK CMYK colors, 16 oz. of FastINK white, 1 gallon of FastINK Pretreatment (necessary for white ink), FastRIP, FastARTIST and training manual. Production rates will be lower when printing on dark shirts.

myT-JET.com

Optional T-Jet Accessories and Supplies

Description	Price
Cap Attachment	$375.00 ea.
Standard 13" x 18" Shirt Holder (33 x 45.7 cm)*	$155.00 ea.
Oversize 13" x 21" Shirt Holder (33 x 53 cm)*	$175.00 ea.
Youth 10" x 12" Shirt Holder (25 x 30.5 cm)*	$145.00 ea.
Sleeve 6" x 18" holder (15 x 45cm)	$145.00 ea.
Infant 6" x 6" Shirt Holder (15 x 15 cm)*	$125.00 ea.
Replacement printing head (One combined head per machine.)	$295.00 ea.
On-site installation & training (Customer pays travel and hotel.)	$1,500.00

Fast T-Jet3 INCLUDES FastARTIST and FastRIP! These are both PC/Windows based programs and do not work on a Mac. You need a PC/Windows computer to run the Fast T-Jet line of printers. You can create images on a MAC and then bring them to the PC for printing.

Prices may vary depending on country, duties, shipping and handling charges, and exchange rates. Check with your dealer for the current price and availability in your location. Outside of the USA we only sell Fast T-Jets through authorized dealers who provide installation, service and training. Shipping and handling charges not included. Fast T-JET3™ includes a one-year limited warranty on parts and labor. The warranty is NOT on-site and requires the unit to be returned to U.S. Screen or authorized service center in your country. The limited warranty does not include the printing head. Replacement printing head is $295 USD and can be replaced in less than ten minutes. All prices and design specifications subject to change.

Available from a large international dealer network.

T-Jet 3™ FEATURES

User's Manual Training DVDs

All Fast T-Jet printers include a detailed training manual and a number of training DVDs. For most users this is all that is necessary. Hands-on classes are also availble.

Easy Controls

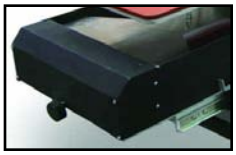
The Fast T-Jet is easy to use with simple touch pad controls.

Exhaust Fans

Ink mist can get on key components. The special exhaust fans remove excess ink mist and impurities inside the printer. Includes foam easy-clean filters.

Bulk Ink System

Reliable ink delivery to the print head is critical when printing ink FAST. The industrial bulk ink system uses large refillable bottles with extra large hoses for troublefree printing. No complicated valves. Easy to refill. Adjustable shelf.

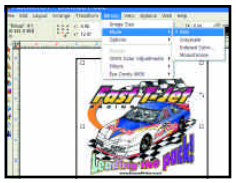


Adjustable Bed Height

You can adjust the height of the printing bed up to 2 inches (5cm) for items of various thickness.

Print Caps

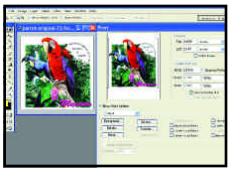
Print baseball caps two at a time with the Fast T-Jet. Our special holder keeps the cap flat during printing. Print caps in 20 seconds!



FastARTIST

All Fast T-Jet printers include an excellent graphics program called FastARTIST. It is similar to Corel and Photoshop and is designed to work hand-in-hand with the T-Jet.

FastARTIST includes a series of DVDs for training and a complete User's Manual.

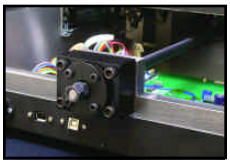


Print from Corel Draw, Photoshop or Illustrator.

If you prefer, simply print from your favorite graphic program to light and dark garments!

Heavy Duty Ink Hose Holder

In order to maintain positive control over the ink feed tubes, they are housed in a special industrial cable chain.



Direct Drive

We use a heavy duty drive motor connected to a Teflon coated direct drive shaft for accurate bed movement. This method prevents registration issues common with friction drive machines.

Print Two Shirts at a Time.

With the optional 2-Up Youth Shirtboard you can print two 10" x 9" (25 x 23cm) images at a time.

Object Sensor

To prevent the head from hitting garments, the printer is equiped with optical object sensors to stop the print head motion if there are any obstructions in the print path.

Easy Load Shirtholder

Shirts are simply laid on a special non-slip shirtholder. Optional holding rings are available for hard-to-hold garments.

Very FAST

Most printers have 90 inkjet nozzles per color. The Fast T-Jet3 has 180 nozzles per color for faster and more vibrant prints. And, more nozzles means much brighter white.

Specifications:

Size: 36"W x 21"H x 36"L* (91 x 53 x 91cm)
** Due to the long bed travel, a total of 60" (152cm) clearance end-to-end is necessary.*

Weight: 100 pounds (46kg)
Inkjet Engine: 8 color (4-CMYK 4-White) 180 nozzles per color.
Box dimension: 37"W x 40"D x 26"H (94 x 101 x 66cm)
Printer ships on a skid and will not ship via UPS or FedEX. It must be shipped via common carrier or truck.
Electrical: 100 - 240v A.C. 60/cycle 4 amps.
Computer connection: USB or Firewire.
Additional machinery: Heat press/dryer, powerful PC computer for FastARTIST and FastRIP.
Room conditions: The printer will operate best in a clean, dust-free room at a steady temperature between 68° F and 85° F (20°C and 29°C), with relative humidity between 40% to 80% (noncondensing).

Operation of the printer at humidity below 40% humidity or above or below the recommended temperature range will result in poor nozzle print performance and poor print image quality.

CE approved.
Made in the U.S.A.
(Epson printengine made in Japan)
Specifications subject to change without notice.

Get HIGH Production with TWO Fast T-Jet3 Printers!

HIGH PERFORMANCE T-SHIRT FACTORY!

Print black shirts in about one minute! And, get brilliant light shirt prints.

With our High Performace setup you can print dark shirts more than TWICE AS FAST as a normal single Fast T-Jet. This system uses two specially setup printers. One printer has EIGHT colors (CMYK plus Orange, Blue, Green, Red). This machine prints with very bright colors on light and dark shirts. The second machine prints ONLY white ink in all EIGHT of the print heads. The white ink prints very fast.

By printing the white ink on the first machine and then moving that shirtholder to the second machine for the colors, very high production can be obtained. And, you have the brightest and fastest white ink in the industry when only white is needed and you have the fastest and brightest colors on light shirts. You get the best of both worlds without registration issues. One operator can easily keep both machines running at the same time.

Print two shirts at a time for high production.

One operator!

$34,995^{00}

A $37,000 value

Price includes two complete Fast T-Jet3 printers (one with 8-colors and one with 8-white) and all accessories, ink and software that go with each printer, one HIX 16" x 20" heat transfer press, fully configured computer, two user version of FastARTIST, two extra adult shirtboards, and special shirtboard registration guides for each printer.

FAST T-JET™ BLAZER

Serving the industry since 1978!

Plenty of storage for ink!

Same great print quality features as the T-Jet Jumbo2 plus this machine is

MADE IN AMERICA!

(except for Epson print engine).

Print up to 16.5" x 44" (41 x 111 cm).

Fast T-JET™ Blazer is similar to the **Fast T-JET™ Jumbo2**. It uses the very robust and fast Epson 4800 as the print engine. It will print vibrant, washfast prints on white, light and dark shirts **VERY FAST**.

Fast T-JET™ Blazer is a full-size floor-standing unit that measures 48" W x 85" L and 48" H (121 x 215 x 121 cm). It also prints on towels, panties, shorts, bibs, bandanas and more. You can print up to 16.5" x 44" (41 x 111cm) and print three shirts back-to-back!

Fast T-JET™ Blazer is great for small and large jobs. With an ink cost of less than 40 cents per shirt (standard print size on light shirts) and speeds of about 45 seconds for a standard size image you can get great production! It also has a built-in laser light safety stop that prevents the unit from working if there is anything in the path of the adjustable height print head.

Fast T-JET™ Blazer uses four color (CMYK) inkjet technology and comes complete with a bulk continuous flow ink system and four 8 oz. starter bottles of **FastINK™ TEXTILE** CMYK color, 1 liter of **FastINK White**, two gallons of pre-treatment for dark shirts, AND a great graphics program called **FastARTIST** and **FastRIP**. You can print from most graphic programs like Photoshop, Illustrator and Corel draw, or you can create the artwork and print from our powerful FastARTIST.

You get a very washfast print. The finished print needs to be heat-set using either a standard heat transfer press or conveyor dryer. No additional treatment is necessary.

** Production rates are lower when printing white ink on dark shirts.*

Youth 10" x 12" (25 x 30.5 cm) Shirt Holder	$145.00 ea.
Sleeve 6" x 18" (15 x 45cm) Shirt hold	$145.00 ea.
Infant 6" x 6" Shirt Holder (15 x 15 cm)*	$125.00 ea.
Replacement printing head	$595.00 ea.
One Year Extended Warranty	$3,300.00 1 yr.
Two Year Extended Warranty	$5,995.00 2 yr.

Extended warranty must be purchased at time of sale of FastT-JET JUMBO2 and can be included as part of a lease package.

Fast T-JET™ JUMBO2 includes a six-month **on-site** limited warranty on parts and labor. The limited warranty does not include the printing head and does not include on-site service to replace the printing head. Replacement printing head is $595 and can be replaced in less than 20 minutes. Response time is from one day to five days depending on location. Prices may vary depending on country, duties, shipping and handling charges, and exchange rates. Check with your dealer for the current price and availability in your location. Outside of the USA we only sell Fast T-Jets through authorized dealers who provide installation, service and training. Shipping and handling charges not included. All prices and design specifications subject to change.

High Volume inkjet-to-shirt printing is now a reality!

FAST T-JET™ Pro HV

If you are one of the people who thought you couldn't get "screen print press production" from an inkjet printer, **Fast T-JET™ PRO HV** will prove you wrong. How does 150 to 300 shirts or more per hour* sound - day after day, 24/7 with minimal maintenance and downtime? This is a real money maker. You get **ink costs from 10 to 30 cents per print** (light shirts) and $1.00 per print for black shirts, high production, AND, ***no more*** screen making, long setup times, color separations, cleanup, harsh chemicals or lots of employees. With ONLY two non-skilled operators you are printing more shirts with less floor space than screen printing. **How about FIVE minute setups between jobs!!**

Fast T-JET™ PRO HV prints shirts non-stop. The shirts are loaded and unloaded just like in a normal screen printing shop. The printer uses special printing beds that hold four or five shirts at a time. As the beds come off the machine they are loaded and unloaded and then moved to the back of the machine for printing using a unique conveyor system. You get 100% throughput with no starting or stopping. Finished shirts just keep coming off the press! It prints a basic 12" x 8" (30cm x 20cm) image on four shirts at a time at the rate of **up to FOUR SHIRTS PER MINUTE!***

For larger images or images needing a heavier deposit of ink, production rates may drop. **When printing white ink on dark shirts expect TRUE production rates of 125 to 175 prints per hour!**

Production rates of over 400 to 450 per hour are possible when printing unit or piece printing of small images on youth size holders.

* Production rates vary depending on size and quality of image. Rates are based on a normal cartoon type image that is approximately 12" x 8" (30 x 20cm) printed with the highest speed/non-critical image setting. These rates are based on actual print times and are based on having NO pre-press found in a typical screen printing shop. A four-color 500 piece order using screen printing would have an additional hour or two of artwork and color separation time (minimum), film output for each color, screen making (30 minutes) press setup and tear down (up to two hours), screen reclaiming (15 minutes) and possible re-makes of separations and screens on critical jobs.

Don't buy another automatic screen printing press until you look at Fast T-JET™ PRO HV.

Fast T-Jet PRO Price

Light Shirts Only $240,000.00*

Light & Dark Shirts $260,000.00**

Optional Automated Conveyor $24,995.00

*** Does not include white ink upgrade.**

**** Includes white ink upgrade (24 hour ink recirculating system, magnetic stir, complete re-plumbing of unit for white ink).**

Printer Price INCLUDES installation and training!

Prices may vary depending on country, duties, shipping and handling charges, and exchange rates. Check with your dealer for the current price and availability in your location. Outside of the USA we only sell Fast T-Jets through authorized dealers who provide installation, service and training. Prices and specifications subject to change without notice. Shipping and handling charges not included. Additional equipment or services required to operate machine are not included. Price does not include shirt drying system, air compressor, running water, proper voltage, drain and possible monthly waste disposal.

Fast T-JET™ PRO HV includes a one-year **on-site** limited warranty on parts and labor and six month warranty on defects in printing heads. All prices and design specifications subject to change. Warranty and additional specification details available at www.screenprinters.net. Delivery time 3 - 4 weeks.

Incorporating the latest DuPont™ Artistri™ technology.

Print over 150 to 300 light shirts per hour and 150 dark shirts per hour!
Run this 24/7!

If you want the industry's highest production machine with REALISTIC actual production rates, look no further. With a unique **dual** 8-head printing system, you get 16 high-speed, high-volume industrial printing heads!

Fast T-JET™ PRO HV is a rugged machine that is well-built. It measures 116" W x 83" D x 56" H (295 x 211 x 142 cm). The entire footprint for the printing machine, the garment moving conveyor system, a conveyor dryer and staging areas is NO LARGER than 24' x 20' (731cm x 609cm) The machine weighs 3800 pounds (1725 kg) and requires 220 volts 30 amp single phase, a small compressor, and running water and drain or sump pump.

A **Fast T-JET™ PRO HV** outfitted with the White Ink Option includes a complete garment moving conveyor system, six standard shirt beds with four 12.5" x 16" (31.75cm x 40.5cm) shirtholders each (optional five holder bed shown in pictures), 32 liters of ink colors, 20 liters of white, complete white ink upgrade, operating manual, spare parts package, FastRIP T-Jet, FastARTIST, free support AND free installation and training (price does not include freight or equipment such as air compressor, dryer, room prep, etc.) Optional youth and oversize shirt holders are available along with holders for odd size units or cut pieces.

Get vibrant bright prints with EIGHT COLOR ink set! The Fast T-Jet PRO uses CMYK plus Red, Orange, Green and Blue as spot colors for outstanding print quality and excellent washability. You will get superb detail that is unsurpassed with any other printing process!

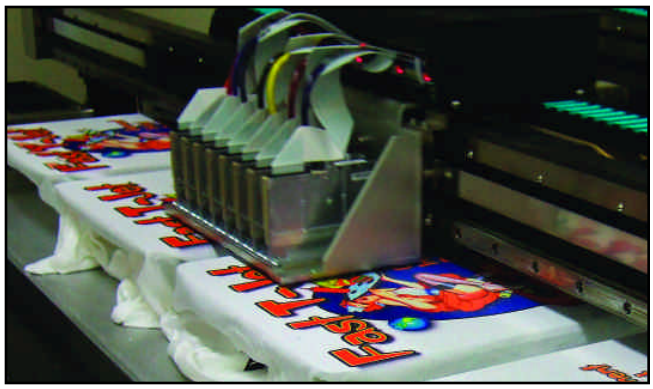
The future of garment decorating is here today.

Fast T-JET™ PRO HV uses specially formulated **FastINK™** to give bright, vibrant prints on light and dark colored shirts. The ink is packed in easy-to-use 2 liter bags that fit into reusable cartridge cases that can be changed while the machine is printing. The colorset for FastINK is CMYKROGB - cyan, magenta, yellow, black, red, orange, blue, green. **With the addition of four "spot" colors and CMYK you get TRUE reds, greens and blues!**

Finally...High Volume Direct-to-Garment Printing is Here!

The problem with inkjet direct printing garments in a high volume shop is that inkjet printers don't have an easy method of throughput. Traditional systems have no way of moving shirts around without sacrificing print speed. We have taken our over 35 years of Screen Printing experience and developed a unique, patent pending method of printing shirts using a specially designed printing bed with a circular conveyor system to easily move shirts, cut pieces, or "units" from the exit end of the printer back to the input end.

In fact, this system works with only TWO unskilled operators and a small footprint compared to a traditional screen printing shop!



Product Specifications for Fast T-Jet™ PRO HV

Printable image area	10" x 12" (25.5 x 30.5cm)			
(Depending on printing bed)	12.5" x 16" (31.75 x 40.5cm)			
	16" x 20" (40.5 x 51cm)			
Number of Print Heads	16	Light shirts only 16-CMYKROGB		
		White Upgrade 8-CMYKROGB 8-White		
Print Speed and Resolution - Light & Dark Shirts**		**360dpi***	**540dpi**	**720dpi**
12" x 8" (30.5 x 20cm) image at normal quality		310pph	250pph	200pph
12" x 14" (30.5 x 35.5cm)		220pph	160pph	125pph

*360dpi is ideal for a T-Shirt type print.
** A printing resolution of 540 or 720 will produce the brightest white prints when printing on dark shirts.

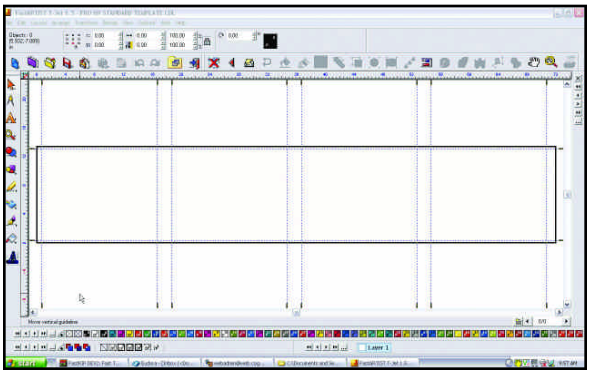
Head Clearance	10 mm max. (adjustable for thick garments)
Nozzle Type	Drop-on-demand piezo
Ink Capacity	2 liter sealed bag per print head (16 heads)
Ink Type	Waterbased pigment
Ink Color Set	FastINK CMYKORGBW Cyan, Magenta, Yellow, Black, Orange, Red, Green, Blue, White

Dimensions	**Pro HV only**	**Complete System Footprint**
Length:	83" (211cm)	24' (731cm)
Width:	116" (295cm)	20' (609cm)
Height:	63" (160cm)	63" (160cm)

Installed Weight	Printer 3,750 lbs (1,700kg) Conveyor system and beds 1,500 lbs. (680kg)
Operating Temp.	59° to 86° F (15° to 30° C) and 40% to 80% RH (non-condensing).
Ink Storage Temp.	-4° to 131° F (-20° to 55° C)
Utilities Power:	200-230 volt single phase 50-60 Hertz, 30 amp
Air:	5 kg/cm2 (72 psig) @ 50 NL/minute (1.8 ft 3/min), clean dry air, oil free
Water:	3 liters/minute clean water
Drain:	3 liters/minute of water
Compliance	FCC, CE
Options	Automatic shirt moving conveyor system.
Ink Cost	$250.00 USD per liter for colors and $295.00 USD per liter for white. Sold in 2 liter bags. (Volume discounts available.)
Ink Cost Per Print	Ink usage varies greatly with the size of print and print quality. Average print costs for a standard garment print is $.20 to .35 per print for light shirts and $1.00 to $1.50 per print for full size dark shirts.
Optional Beds	Adult $1,795.00 ea. 5up Oversize $1,795.00 ea. 4up Youth $1,995.00 ea. 10up
Extended Warranty	One Year $17,500 (Price for second year. First year covered.)

Call for a separate brochure and DVD on the Fast T-Jet PRO. Better yet, come to our Tempe office and see a PRO for yourself!

Optional fully automated conveyor system.



Printing has never been easier. Simply drop the images into pre-done templates in FastARTIST and press the RIP button. Most images rip in less than five minutes. Print!

You are in good hands with the Fast T-Jet PRO. Why?

Because it is based on the popular DuPont Artistri 2020 roll-to-roll textile printer used around the world. In fact there are over 150 Artistri 2020 machines installed!
U.S. Screen Print & Inkjet Technology has an exclusive license with DuPont to be able to modify and sell this machine exclusively for T-Shirt and piece goods applications.

The modifications took over 8 months to engineer and test and include precise raising of all the head carriages, capping stations and key systems, and the design of a patent pending garment moving conveyor with aerospace quality shirt beds that can be leveled individually. Other major modifications include a complete belt reinforcing structure and complex changes to the "plumbing" to incorporate the use of white ink. The printer has a system of monitoring the white ink and stirring it every few hours to keep it from settling. The total modification parts list totals over 200 individual pieces and takes 100 man hours to install and test by U.S. Screen's DuPont certified technical staff.

Special software was developed to create the proper underbase files for printing on dark shirts and to color calibrate the machine for printing on jersey knit garments.

This is NOT a standard Artistri 2020 printer. This is the *Fast T-Jet PRO* designed by garment decorating expert Scott Fresener and the staff of U.S. Screen.

See a short video of this machine in action online at: www.myt-jet.com.

FAST T-JET™

Printing White Ink on a T-Jet

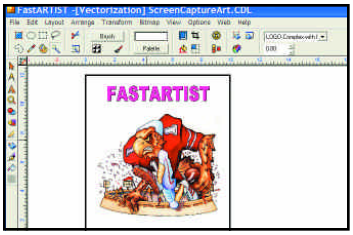
White Ink Overview
Printing white ink on an inkjet printer is VERY HARD. In fact, we spent over one year trying to develop the proper ink. The problem is that inkjet nozzles print very thin deposits of ink that is like water. It is certainly NOT the same as a thick traditional screen print plastisol. In fact, it really should not work. And, white ink tends to settle if not used properly. The only real way to print white is to find a way to keep the pigment setting on top of the garment.

Pretreating Garment
In traditional inkjet printing on textiles (bed sheets, shower curtains, gaming tables, carpet, etc.), a pretreatment is used to make the fabric inkjet ink receptive and to keep the pigment on top. This is the same method we use to create STUNNING black shirt prints.

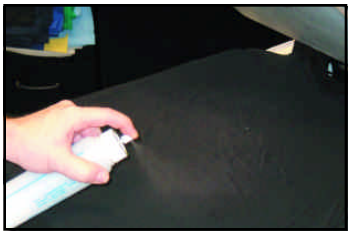
Software is part of the magic
Even with the ink and pretreatment, software is needed to tell the printer how much white to print out of what ink cartridges, AND, how to print a grayscale underbase of the image (only a novice prints solid white). And.... a great black shirt print needs a highlight white to boost the white where it needs it.

This is what give "US" the edge. Over the years we have become known as black shirt printing and underbase experts. Our FastFILMS color separation program for screen printing is used on most black shirts that are screen printed around the world. We were able to transfer these years of knowledge and experience to FastARTIST and FastRIP.

1. Create the image in your favorite graphic program or in FastARTIST. Or, use customer supplied art. FastARTIST creates an underbase and highlight file. Print directly from FastARTIST.



2. Spray a light mist of pretreatment on the garment and dry it quickly in a heat transfer press or conveyor dryer. A heat press works better because it mats down the garment fibers.



3. Load a shirt in the printer and print from FastARTIST. Most prints will need two passes of white ink to get good coverage. Medium colored shirts may only need one pass of white.

4. The last pass is for the colors of CMYK. This pass also prints a highlight white ink that boosts the white ink even more making it look better than screen printing!

5. Cure the print in a heat transfer press (recommended) or through a conveyor dryer. Dark shirt prints look great and hold up through repeated washings.

Why buy a T-Jet from U.S. Screen?

We are the market leaders
As the market gets crowded with competitors the obvious question is "why should you buy a printer from U.S. Screen?" If you are new to the industry you may not know who we are.

U.S. Screen Print & Inkjet Technology has been around since 1979, and company founders, Scott and Pat Fresener, have been in the industry since 1970. You will be dealing with one of the most respected and reputable companies in the industry.

But, what does this mean? It means that we stand behind our products; they are manufactured to exacting standards; the Freseners bring their screen print and garment printing knowledge and apply it to inkjet printing; they offer the best support in the industry; they have sold more machines than any other manufacture; AND, they have the brightest colors and best white ink in the industry!

It means you will not be dealing with an "agent" for a foreign manufacture who will "have to get back with you" for support. It means we talk your language and are here with live body support even after hours!

What more can you ask for? Do not buy on price alone. There is much more to an expensive purchase than that.

A Word About the Competition
We do not try to sell by spending all of our time talking about the competition. We feel the way to sell products is to talk about what benefits we can give you and how our products will help you make more money and have a successful business.

But, we feel it important that you not be swayed by comments from our competitors. Make sure to get names of actual users and to see shirt samples. Ask for real production rates and ink costs and demand that you get the real numbers. Anyone can generalize at production rates. Get the facts.

As for white ink, do NOT buy a printer based on the promise that "white is coming." It took us over a year to develop white ink and we know we are on the leading edge. Make sure when you buy a printer to print white ink that it really prints WHITE ink. One well known company offers "discharge printing" as "white" when in fact discharge is an old screen print technique to bleach the dye from the garment. It gives you the natural shirt color and not white. Again, get samples.

When competitors have to spend all their time talking about us there must be some reason they don't talk about themselves!

Find a dealer from our world-wide dealer network.

AutoTREAT PRETREATMENT CENTER

$6,995.00
TJ-AutoTreat

Now you can get perfect pretreatment when printing white ink on dark shirts or when using our exclusive *FastBRIGHT* pretreatment on light and medium colored shirts. Our new **AutoTREAT Pretreatment Center** is a robust, heavy duty, pretreatment machine.

Simply lay a shirt on the bed and press the Load button. Shirts can be pretreated in 15 to 20 seconds! And, you can adjust the amount of pretreatment (light or dark shirts), the speed of the bed AND you can pretreat specific areas depending on the image size. You can choose between our normal pretreatment for dark shirts; *FastBRIGHT* for light and medium colored shirts; or water to flush out the pretreatment lines.

The **AutoTREAT Pretreatment Center** is not just a simple spray nozzle and tank. It contains industrial strength spray controllers designed to pulsate the pretreatment and apply it in a very uniform controlled pattern. The digital readout control panel allows you to dial in the exact amount of pretreatment required for different shirt colors. The special spray nozzle is the same as used in very high end industryual spray applications. There is even a cleaning cycle to flush out the system.

The unit is easy to maintain and requires no training.

This is NOT just a simple spray booth. From the industrial controller to precision valves and spray nozzles, the AutoTREAT applies the proper amount of pretreat...every time!

Print on Non-Textile items with your Fast T-Jet!

You can now print on a variety of non-textile products using your Fast T-Jet. Print on golf balls, koozies, tiles, plastic, wood, metal and more using your standard FastINK Textile ink. No ink to change!

Most items need a special inkjet receptive pretreatment that can be sprayed or brushed to the items. For items that need abraision resistance you can coat or spray a Post Treatment.

You can make holders for these items or simply lay them in the printing bed. We can supply a special optional golfball holder for $99.95.

Apply the Pretreatment or Primer with a brush or spray bottle. Print the items on your T-Jet. Dry the images with a hair dryer, heat press or let the item air dry. Easy!

Non-Textile Pretreatment

Fast T-Jet™ Pretreatment for Non-Textiles is designed for use as an inkjet ink receptive base coat when printing directly onto non-textile materials such as plastic, metal, and wood using your standard Fast T-Jet™ Garment Printer and FastINK™ Textile ink. For increased durability of the final print use our Fast T-Jet™ Post-Treatment on top of the final print. Certain high gloss material may need to be prepared with our Non-Textile Primer Pretreatment BEFORE using this Pretreatment. You do NOT need to change inks when using this product.

Non-Textile Primer

Fast T-Jet™ Brand Non-Textile Primer is designed to be used on high gloss non-porous surfaces as a primer coat prior to the application of our standard Fast T-Jet™ Brand Non-Textile

Non-Textile Post Treatment

Using Fast T-Jet™ Non-Textile Post Treatment: For increased durability to abrasion and added UV protection, spray the Fast T-Jet™ Non-Textile Post-Treatment over a fully dry printed piece. Consult the Fast T-Jet™ Non-Textile Post Treatment label for proper use and warnings.Pretreatment.

FastINK™ TEXTILE is a specially formulated water based pigment textile ink that will work on 100% cotton (light and dark) and 50/50 (light colors) material. It only needs a simple heat setting to make the print washfast. FastINK is manufactured to exacting standards and is the brightest ink in the industry. And, we have THE BEST white ink anywhere.

HIX Heat Transfer Presses

Cure your prints with the number one brand of heat transfer presses - HIX. When printing with white ink, a heat press helps make the print brighter.

Presto 15 Standard Economy Press

- 15"x15" heavy duty, even heating platen.
- Separate digital timer included.
- Sturdy steel design that is very portable at only 53 lbs.
- Calibrated thermostat can be set from off to 450°F.
- Heat indicating light turns off once set temperature is reached.
- Easy to open and close handle with spring assist.
- Press opens a full 50° for easy placement of products.
- Lifetime warranty on heating element and 1-year warranty on components.

$659.00

HIXPRESTO15

SwingMan 15 Economy 15"x15"

- 15"x15" heavy duty, even heating, swing away platen.
- Sturdy steel design that is very portable at only 64 lbs.
- Separate digital timer included.
- Easy to use open and close handle with full range pressure adjustment.
- Calibrated thermostat that can be set from off to 450°F.
- Heat indicating light that turns off once set temperature is reached.
- Lifetime warranty on heating element & 1-year warranty on components.

$659.00

HIXSWINGMAN15

HT-400D Digital Standard Press

- 15"x15" heavy duty, even heating platen.
- Digital timer is adjustable up to 999 seconds, shows time countdown on readout, beeps after elapsed time.
- Calibrated digital temperature control is adjustable up to 450°F (232°C) and displays the current temperature.
- Self leveling, silicone rubber covered lower platen provides even alignment on delicate objects.
- Easy to open and close handle that has spring assist.
- Press opens a full 40° for easy placement of products.
- Lifetime warranty on heating element and 1-year warranty on components.

$899.00

HIXHT400D15

Hobby Lite 9" x 12" Heat Press

- 9"x12" even heating, swing away platen.
- Separate digital timer included.
- 23 lbs. Lightweight and portable for hobbyist to use at malls, flea markets, shows, and more.
- Works on items up to 1-1/2" thick.
- Easy to open and close handle with full range pressure adjustment.
- Calibrated thermostat can be set from off to 400°F.
- 1-year manufactures warranty on components.

$354.00

HIXHOBBYLITE

Save $200 on ANY HIX Heat Press with the purchase of a Fast T-Jet!

Presto 20 Large Economy Press

- 16"x20" heavy duty, even heating platen.
- Separate digital timer included.
- Economical for a start up shop or to use as a backup.
- Works on items up to 1/2" thick.
- Calibrated thermostat can be set from off to 450°F.
- Heat indicating light.
- Full range pressure adjustment.
- Press opens a full 40° for easy placement of products.
- Lifetime manufacture warranty on heating element and 1-year manufacture warranty on components.

$870.00

HIXPRESTO20

HT-600D Digital Standard Press

- 16"x20" heavy duty, even heating platen.
- Sets the standard in the manual heat press industry.
- Applies all types of transfers on items up to 1/2" thick.
- Digital timer.
- Calibrated digital temperature control.
- Easy to open and close handle that has spring assist.
- Press opens a full 40° for easy placement of products.
- Lifetime manufacture warranty on heating element and 1-year manufacture warranty on components.

$1,115.00

HIXHT600D

HOSS High Volume Press

The HOSS is fully automatic, all the operators need to do is load the garment on the pallet to the right, it cycles automatically. Then load a garment on the left pallet, it cycles automatically and the right pallet returns. Repeat the process again.

FEATURES INCLUDE:

- Two 16"x20" upper heat platens and four 16"x20" silicone rubber covered lower platens.
- Adjustable dwell timer to control transfer pressing time.
- Separate digital temperature controls.
- Independently adjustable air pressure controls for each station.
- Platens automatically index at your set cycle time.
- Adjustable work height.
- Plug in electric and quick connect air fitting.

$13,395.00

HIXHOSS

B-250 Cap Press

- Use to cure T-Jet printed caps.
- Sturdy design that is lightweight and portable.
- Separate digital timer included.
- Calibrated thermostat can be set from off to 450°F.
- Easy to open and close handle with full range pressure adjustment.
- Press opens a full 70° for easy placement of products.
- Lifetime warranty on heating element & 1-year warranty on components.

$555.00

HIXB250CAP

Create Film Positives on an Inexpensive Inkjet Printer!

FastRIP™

Really Impressive Prints!

Have you been looking at inkjet printers for film output but were turned off by the speed? Inkjet printers with a software RIP driver have taken the industry by storm the last few years. The only thing that has separated us from Thermal Imagesettes was speed - Thermal Imagesetters were faster. That has all changed! We have developed a way to use FOUR black ink cartridges in an Epson 4800 along with patent pending variable dot software to print **FULL SIZE FILM POSITIVES IN UNDER ONE MINUTE! And, at very high resolution! WOW!**

If you are new to the business you don't realize how huge this is. We call this variation on our FastRIP PRO software, FastRIP PRO *High Speed*. And, it is a thing of beauty!

For guaranteed results, highest print speed and film that dries immediately - this printer and FastRIP package is designed to use FOUR FastINK Dye black cartridges with FastPOS Waterproof film only. When using four black cartridges the quality of color output may suffer slightly.

We will NOT guarantee the quality if you use film and ink from other third party companies. This is a system of film, ink and software that works beautifully when used together.

View a 13 minute online video about FastRIP at:
www.ScreenPrinters.Net

- **Available for Windows/PC or MAC.***
- **Free support.**
- **Easy to use.**
- **Imagesetter quality.**
- **Clean, crisp halftones.**
- **Sharp "Index" stochastic square dots.**
- **Uses off-the-shelf Epson ink or FastINK.**
- **Perfect registration!**
- **Calibrated and designed for screen printing.**
- **Works with PhotoShop, Corel Draw, Illustrator, Freehand, Quark and FastFilms.**
- **Print color calibrated proofs AND heat transfers!**
- **130-page manual in English AND Spanish.**

FastRIP™ comes with a handy Wall Chart Cheat Sheet.

What is FastRIP?

FastRIP is a PostScript interpreter called a *raster image processor* (RIP). Without PostScript it is impossible to print high-quality halftone dots on a "non-PostScript" inkjet printer such as an EPSON R1800 or 4800. Even if your printer has PostScript, it may not be able to print halftone dots because PostScript is often just used to calibrate and balance colors on an inkjet. The EPSON "RIP" does not print halftone dots! **FastRIP does!**

And, FastRIP tells the inkjet printer to lay down a much denser deposit of black ink. You will think you are looking at imagesetter quality output. And... the halftone dots are carefully calibrated so if you specify a 50% dot you get a 50% dot on the film!

Easy To Use

With FastRIP you print directly from Adobe PhotoShop, Illustrator, Corel Draw, Freehand or FastFilms. There are no additional steps and no confusing commands or "hot folders." Just press the Print button as you normally would. You specify the halftone line count and angle just like you always do. And, when you burn screens from clear film with crisp, sharp black images that are as dense as imagesetter output, you will find your screens expose MUCH better. No more playing with exposure times like you do with laser output. Your halftone dots are a thing of beauty!

And.... there is more!

You aren't limited by the size anymore. If you output to an EPSON 4800, you can print up to 17" x 22." Better yet, go to the EPSON 7800 and output 24" wide material or the EPSON 9800 and get 44" output! This is HUGE. No more tiling and no more shrinking jobs to fit on your laser printer. Plus the registration is DEAD ON! You can also do accurate, calibrated paper color proofs in both normal inkjet output or in halftones so the customer will see what the print will really look like, and if you print T-Shirt transfers using special coated paper, FastRIP is calibrated to make them look great! The FastRIP Manual and Training DVD is also available in Spanish!

Check our website for the most current supported printer list.

FastRIP Software Only

If you have the printer we have the software!

We now have over 4,500 VERY HAPPY FastRIP users around the world!

FastRIP™ Standard

For Epson 1520 & 2200 - 13" wide
For Epson R1800 & R2400 - 13"
For Epson 3000 - 17" wide output

Item# FASTRIP **$595.00**

For guaranteed results we ONLY recommend using this printer and FastRIP with FastINK Dye black and FastPOSITIVE Waterproof film.

Epson R1800 with FastRIP Standard.

FastRIP™ PRO

For Epson 4000 & 4800
17" wide output

Item# FASTRIPPRO **$795.00**

Item# FASTRIPPROHS* **$1,495.00**

*For guaranteed results, highest print speed and film that dries immediately - this printer and FastRIP package is designed to use TWO FastINK Dye black cartridges with FastPOS Waterproof film only. When using two black cartridges the quality of color output may suffer. *FastRIP PRO High Speed uses four black inks!*

Epson 4800 with FastRIP PRO.

FastRIP™ XL

For Epson 7600/7800 - 24" wide

Item# FASTRIPXL **$1,295.00**

Item# FASTRIPXLHS* **$2,495.00**

FastRIP™ LF

For Epson 9600/9800 - 44" wide

Item# FASTRIPLF **$1,595.00**

Item# FASTRIPLFHS* **$3,695.00**

Add FastFilms to any RIP combo for only $795!

FAST POSITIVE™

Simply the best clear inkjet film on the market! Very smooth on both sides. Contains anti-curl coating and works with off-the-shelf dye-based Epson inks and FastINK™ dye based ink.

The industry's most affordable non-waterproof film.

We worked hard on this one. After A LOT of testing and R&D, we developed what is undoubtably THE BEST inkjet film on the market. FastPOSITIVE is specially formulated clear film that produces very dense black images using off-the-shelf EPSON dye-based ink. It will work with FastRIP and other software RIP's designed for black image inkjet output. FastPOSITIVE is very smooth on both sides and has a special back coating to prevent curl and static. FastPOSITIVE is not water-proof.

Don't buy less expensive inkjet film...

Less expensive inkjet films (like the matte finished films on the market) have major dot gain and give the image a rough edge. Don't save a few pennies on inferior film and waste dollars trying to get the job to burn and print correctly. For the best edge definition and dense dark blacks without pinholes, use film with a smooth coating - like FastPOSITIVE.

With FastPOSITIVE you will get imagesetter quality with excellent registration and no need to adjust exposure times or deal with shrinkage associated with vellum paper. Best of all, you get a very dense positive and it is designed to control ink absorption allowing for fast drying and excellent dot shape retention.

Rolls or Cut Sheets?

Many customers assume the best economy is to buy film by the roll. The problem is that some small format inkjet printers like the Epson RE1800 and R2400 DO NOT print in register when feeding off of a roll. If you want PERFECT registration on these printers, purchase boxes of sheet film. Note: the Epson 4800, 7800 and 9800 have a different feeding mechanism and registration is perfect using roll film.

Do I need a RIP?

If you want DENSE black images and halftone dots, you need a RIP like FastRIP. FastRIP tells the inkjet printer how many passes to make when printing black so the printer lays down a much denser ink deposit when using FastRIP. The magic of getting dense black images is not entirely in the film. The rip is part of the magic!

FastRIP Fine Print...

Second user versions for independent workstations are available. FastRIP will work across most networks. FastRIP uses a USB dongle as a security device.

FastRIP support is free to the original purchaser. Mac FastRIP are for OSX operating system ONLY. There is a FastRIP support area on the internet. All printers are warrantied through the appropriate manufacturer. FastRIP upgrades are not free. There is an "upgrade" charge for FastRIP to upgrade to new operating systems, new versions of software applications, or printer models. We DO NOT ship Epson printers outside the US due to warranty and service problems. Please consult your local Epson distributor for availability or check www.Epson.com.

For user testimonials and more product information visit the FastRIP website.

FAST POSITIVE™ WP
WATERPROOF SERIES
WORKS WITH PIGMENT & DYE INKS

Do you want a film that will not be affected by humidity, perspiration, washout sink overspray, or a coffee spill? Better yet, do you want a film that comes out with the ink immediately dry?

OK, not good enough? How about a film that works with both pigment and dye based ink? FastPOSITIVE™ WP is the answer!

A Word About Waterproof and Non-waterproof Film

So…. which film do you need? FastPOSITIVE™ or FastPOSITIVE WP™? It really depends on your needs. If you want to use off-the-shelf pigment inks that come with the Epson 2200, R1800 and 4000/4800, then WP is a must. If you have high humidity or just don't want to worry about images getting smeared, then again, WP is for you. If you are looking for an affordable solution and you are using Epson dye ink (3000 and 1520) or FastINK dye ink, then our standard FastPOSITIVE™ is fine. If you have problems with your ink drying because of humidity or just the pressure of getting a job on press right now, then WP is a good choice. The special micorporous coating causes the ink to dry IMMEDIATELY!

In the past, waterproof inkjet film has been VERY expensive. Our new FastPOSITIVE™ is 35% less expensive than any competing brand!

PLUS After Hours Emergency Support!

Get *FastPROOF*™ for only $125.00 if you purchase *FastFilms*™ and *FastPROOF*™ at the same time! See page 7.

FastProof

Over 4,000 users worldwide in 75 countries.
Works with Adobe Photoshop 4.0, 5.0, 5.5, 6.0, 7.0, 8.0 CS & CS2.
Available in English, Spanish, French, Portuguese, Japanese and German!

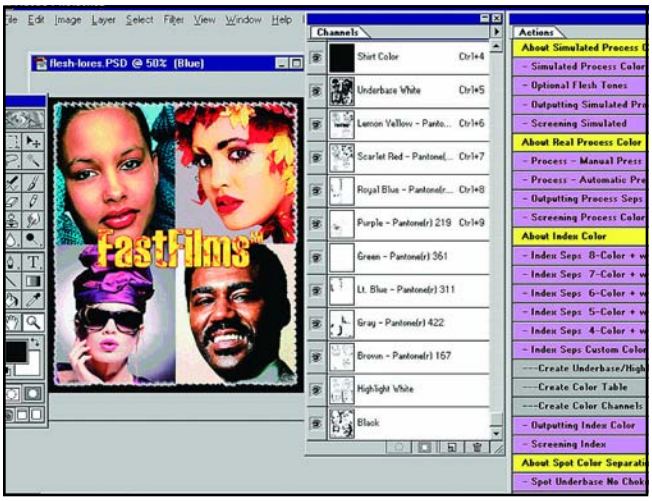
FastFilms™ uses off-the-shelf plastisol ink and even tells you the mesh count, Pantone® color, color sequence, halftone frequency and angles!

Its' so easy that even beginners with limited Photoshop experience and homemade equipment can do outstanding prints.

It's Easy! Scan, Separate and Output.

Imagine being able to scan a photograph and in just a few minutes separate from two to twelve colors ready to print out for dark and light shirts! ***FastFilms***™ is an Adobe Photoshop plugin that is very easy to use and includes a 60-page reference manual, Quick Reference sheet, online support, free phone support, PLUS a special web-based user area and detailed ***Training Video***! You can even create the image in Corel Draw, Illustrator, Freehand or Photoshop. When you are done separating - print-out a very accurate color proof on an inkjet printer.

Best of all FastFilms is available for both MAC and Windows.



FastFilms™ separates most jobs in less than five minutes AND you get a very accurate monitor preview of what the job will print like. Now you can quit sending out for high-end seps - do them in-house just like the pros. Output to an inkjet with PostScript, your laser printer on vellum or laser acetate, or an imagesetter. You can even do *square dot* index separations with **FastFilms**™!

Its so easy you will do jobs the day you get the program!

Buy from someone you know and trust!

This unique automated software is based on Scott Fresener's years of teaching the processes and his intimate knowledge of screen printing and using Photoshop® for high-end separations. It is like having Scott sitting at your computer doing the seps for you! When you invest in software like FastFilms™ you need to buy from someone you know and trust. Besides being a highly respected industry leader, Scott is also a member of the Adobe Developers Network and was on the beta test team for Photoshop 6.0.

Success breeds imitation and there are a number of "look alike" programs to FastFilms. Don't let a few dollars savings tempt you to buy a program that is inferior and provides poor or no support. And, a program is not a "bargain" if the separations don't work at press and you spend hours making adjustments. The quality of a separation program is directly based on the knowledge of the person who wrote the program. Some programs are being sold by ink companies. Do you really think an ink company should be selling separation software? Trust your instincts and buy from someone you know and trust.

View the entire manual in full-color right on your computer.

Get free on-line support at the FastFilms™ User's Arena.

For Testimonials from happy users go to
www.FastFilms.com/reference.html

Check out our NEW FastFilms Training Class on page 27.

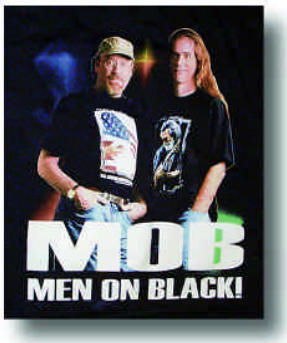
Great for small and large shops! Even if you only have a four-color press!

FastFilms™ is a Suite of SIX Programs!

Simulated Process Color Separations

On light and dark shirts

You don't even need to be good in Photoshop to use ***FastFilms***™. It does everything for you. It will build terrific underbases for black shirts and creates all the color channels ready to output. It makes beautiful fleshtones and the printed image matches what is on the monitor! It even tells you the proper mesh counts, color sequence and more. Great SIX-COLOR routine for manual shops.

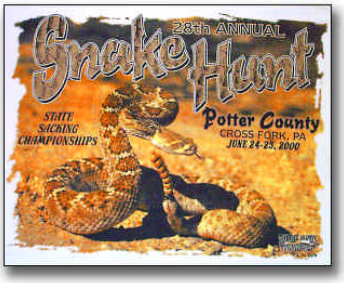


FastFilms™ is being used by most major licensed merchandise printers including people who print for Disney, Harley, World Wrestling and more. In fact, we have one customer who has done over 1,000 separations with FastFilms™.

Index Color Separations

On light and dark shirts

FastFilms™ creates GREAT "square dot" index separations and you don't need any additional programs beside Photoshop. It also makes excellent underbase and highlight whites! Many index jobs can be done with six colors or less!



Real Process Color Separations

CMYK on light and dark shirts.

Now you can print stunning CMYK four-color process on light and dark shirts. **FastFilms**™ also creates an underbase, highlight white and and lets you add up to three spot colors. Some of the largest printers in the world us **FastFilms**!

Special Image Effects

DISTRESSED

Jazz up images with neat effects.

Choose from five different edge effects to liven up images AND do the distressed look too!

Hot-Split Heat Transfer Separations

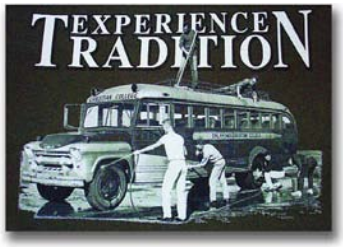
Screened transfers!

FastFilms™ is being used by some of the largest transfer companies in the world for seps.

Sepiatone Old Photo Separations

A great routine!

This is a hot look. Take any colored photograph and turn it into a rich looking black and white image (its actually five colors) or give it an old photo look with the sepiatone routine. **FastFilms**™ creates an underbase and highlight for these too, so they work on dark shirts.



Spot Color Separations

With and without trapping.

FastFilms™ works great with simple spot color images. You can have the program create butt register separations or provide a slight trap to the image AND it will create an underbase with or without a choke!

View hundreds of customer's samples online at
www.FastFilms.com/contest-winners.html

See for yourself. Download a Free Trial version that is FULLY FUNCTIONING for 20-Days! To get the most out of the trial, you can even purchase the FastFilms™ *Training Video* for $29.95 - fully refundable when you purchase FastFilms™.

Learn How To Start and Run a Profitable Garment Printing Business! It's Easy ... with "The Book!"

UPDATED

How To Print T-Shirts For Fun and Profit!

Over 120,000 sold since being introduced in 1979.

By Scott and Pat Fresener

This is ***the*** book the industry talks about. It is responsible for getting thousands of T-Shirt printers into the profitable garment printing business! Every successful shop has a "well used" copy of this book. ***How To Print T-Shirts For Fun And Profit*** has literally become "the Bible" of the industry. It is written in an *easy-to-follow* step-by-step manner by industry experts Scott and Pat Fresener who have been in the industry since 1970.

This book covers everything from A to Z about screen printing T-Shirts and Heat Transfers, and includes sections on printing Nylon Jackets, Baseball Caps and more. It tells you how to set-up a shop, where to find customers, how to run your business, PLUS it contains a complete suppliers listing, dozens of charts and forms AND plans to build your own equipment including a 4-color printer for under $150, plus a *Buyer's Guide* with 450 suppliers and their web addresses!

Revised 2005 Edition, 260 pages. Item # B-HTP **$39.95**

Getting Started in T-Shirt Screen Printing

Beginner to Intermediate level

NEW!!

with Scott and Mike Fresener

If you are just starting out, this course is for you! If you already print, you will be surprised at what you didn't know!

This is what you have been asking for. One course that covers the entire process from start to finish. Learn how to screen print T-Shirts from industry veteran Scott Fresener and his son Michael. From "this is a T-Shirt," to creating color separations, and making a multi-color print. This information packed two DVD course is designed to get you up and running and successfully printing shirts. Some topics are covered in detail and other topics are covered on a basic level. Topics like computer graphics, plastisol inks, and marketing are covered in much more detail in our separate videos and DVDs on those topics. The perfect companion for this course is the book, *How To Print T-Shirts for Fun and Profit*.

Everything you want and need to know about screen printing T-Shirts. Two DVD's! Almost three hours!

Item # DVD-STARTED English **$79.95**

Item# DVD-STARTEDSP Spanish **$79.95**

Here are just a few of the things you will learn:

- About the Industry
- Setting up your shop and equipment needed
- Basics of art preparation and color separations

T-Shirt Graphics With CorelDRAW® 11.0

With Scott Fresener

Corel Draw is the world's number one vector based drawing program. If you want to learn how to do T-Shirt graphics with Corel and learn 100's of tips and tricks that ARE NOT in the manual, then you need this set from Scott Fresener.

From how to install the program and the basics of all the tools, to doing color separations, special effects and more, it's all here! Plus learn lots of undocumented tips, how to fix problems, proper scanning techniques, using Corel Trace, creating underbases for dark shirts, proper trapping, and using halftone dots. **Six hours of video** instruction on this four DVD series featuring Scott Fresener

The beauty of DVD is that you can play it on most computers and you can watch a section and then try what you have learned. PLUS, there is no rewinding or searching because there are dozens of "chapters" that you can go to with one mouse click!

Four DVD Set

Works with 10.0, 11.0, 12.0 and 13.0

Note, there is very little (if any) difference between Corel 9.0, 10.0, 11.0, 12.0 and 13.0. For that reason, this training course works well with most earlier and later versions of Corel Draw.

This DVD does not cover how to use Corel PhotoPaint.

Includes a large wall chart cheat sheet for easy reference!

Basic to Intermediate Level Item # DVD-COREL11 **$149.95**

T-Shirt Graphics With Adobe Photoshop® 7.0

With Scott Fresener

Adobe Photoshop is the number one image manipulation program and Adobe's version 7.0 is HOT! Now you can do your own process color separations IN HOUSE and save thousands of dollars every year. Why send out your process jobs when you can learn what the separators know.

With this step-by-step course you'll learn all about image manipulation, halftones, color correction, proper scanning, unsharp masking, special effects filters, creating process separations AND spot color separations, how to create a white plate, basic dark shirt separations, adjusting separations for specific inks, undercolor removal, tone curve and levels adjustments, action palette, and EVERYTHING THE MANUAL DOESN'T TELL YOU! **Also works great with Photoshop 6.0 and CS 8.0 and CS2 9.0!**

Four DVD Set

Works with CS 8.0 and CS2 9.0!

This four-DVD set also covers the tools and fundamentals of Adobe Photoshop 7.0 and is designed for the beginner AND power user who needs to know about T-Shirt separations. Dozens of "Chapters" for easy reference. This is the course you will constantly refer back to as a refresher.

Four hours of video instruction featuring Scott Fresener.
All new digital mastering for higher quality!

Includes a large wall chart cheat sheet for easy reference.

Basic to Intermediate Level Item # DVD-PHOTO7 **$149.95**

T-Shirt Graphics With CorelDRAW® 9.0

With Scott Fresener

Learn all about the new drag and drop features, how to adjust bitmaps in Corel, all about the new tools, lots of undocumented tips, how to fix problems, proper scanning techniques, doing spot color and process color separations, creating underbases for dark shirts, proper trapping, using halftones, doing hot special effects and a lot more! Four hours of videotape instruction featuring Scott Fresener. Each tape is fully indexed so it is easy to review specific sections. All new digital mastering for higher quality! There is very little (if any) difference between Corel 9.0, 10.0 and 11.0. For that reason, this training course works well with Corel 10.0 & 11.0.

Two-tape set includes a large wall chart cheat sheet for easy reference!

Two VHS Tape Set
Works with Corel 10.0 too!

Basic to Intermediate Level Item # VC-COREL9 **$149.95**

Painting Seascapes in Photoshop

With Dave Moore

This DVD is very cool. If you like watching the PBS shows where they show you how to "paint" a scene, you will like Dave showing you the tricks of creating a complete image in Photoshop.

Taught by veteran artist, Dave "Big Wave" Moore, formerly with Crazy Shirts in Hawaii, you will find Dave easy to follow. This DVD is loaded with dozens of tips and tricks of using Photoshop to create images - whether you plan to "paint" a Seascape or not.

From image creation, to image touchup, great shortcuts and just good computer graphics training, you will like this DVD!

Draw Cars Like The Pros!

With Dave "Big Wave" Moore

Have you ever wondered how they did those realistic car designs on shirts? The mystery is over with this 90 minute DVD by industry veteran and super artist, Dave Moore. Dave's nickname is "Big Wave Dave" because he spent years doing T-Shirt graphics for the famous Crazy Shirt line in Hawaii. You will learn how to start with a photograph of a car and do a detailed tracing. You will then learn the tricks of the pros on how to colorize the car using Adobe Illustrator (these techniques also work in Corel Draw).

Learn how to give the car highlights, reflections and bring a simple line drawing back to life. This basic to intermediate level video will have even non-artists doing great car designs.

In this fact filled session, you will get an inside look at the booming promotional products industry.

60 minutes

Item# DVD-MT-PROMOTION **$49.95**

Creating and Selling A Successful Preprint Line

With Dawn Marsh

Have you created a line of shirts and don't know how to sell them? This DVD was shot live at the U.S. Screen Printing Institute and features Dawn Marsh, an industry veteran with over 20 years of selling her own "pre-print" line. Dawn tells you all of her secrets and the pitfalls of selling a pre-printed line of garments.

You will learn how to get in to see Buyers, how to present your line, all about packaging requirements like hang tags, bagging and more. You will also learn about pricing your line and where to find reps to carry your line.

This DVD presentation is VERY specific to selling a line of pre-printed garments with "tourist" type of images that you might find in airports, gift shops, specialty stores and in the mall. It does not cover how to sell a specific line of garments to specialty industries.

45 minutes

Item # DVD-CREATEPREPRINT **$49.95**

Business and Marketing Course

With Scott Fresener

Running a business in a professional manner and good marketing are the keys to being a success and this course covers it all! Whether you are just getting into the business or are trying to make a profit in an existing business, this course is a must.

It covers everything from creating your own catalog, to how to price your work, getting the larger accounts, getting credit, giving credit, all about the industry, trade shows, trade magazines and more.

It also covers copyrights and trademarks, licensing, and trade standards. It is a great morale booster with terrific tips and ideas on how to package your company for success.

This two DVD set is a video seminar that was videotaped live at the U.S. Screen Printing Institute.

Using Roller Frames

With Charlie Taublieb

Learn how to stretch the industry's popular roller frames in an easy-to-follow step-by-step manner. This DVD includes manual stretching techniques, using a stretching table and using precut panels.

Learn how tighter mesh and better screen stretching give you a superior print, plus dozens of tips and tricks for improving stretching times. A great training tool!

This DVD is taught by industry expert, Charlie Taublieb and shows the right way to use roller frames and how to make stretching easy.

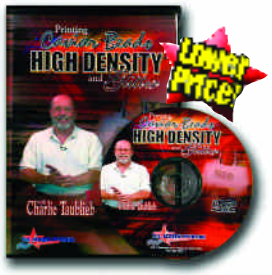
60 Minutes

Stop tearing mesh and stretch screens the right way!

Item# DVD-FRAMES **$49.95**

High Density, Caviar Beads and Glitter!

With Charlie Taublieb



Learn the latest techniques for doing prints with a "feel." Industry veteran, Charlie Taublieb, will teach you how to make images jump off the shirt with high density ink. Learn all about thick stencil screen making, proper ink usage, doing multi-color prints and more.

This DVD also teaches how to use the popular "Caviar Beads" that give the print a "glass bead" feel to it. Learn about screen making, and how to apply the beads using either a manual or automatic press.

PLUS, you will learn about sparkle glitter. Create stunning garment prints with large flake glitter. Learn about special screen making and how to apply the glitter in both a manual or automatic shop environment. ***55 Minutes***

Walk into any mall and THIS is the stuff you see. Charlie shows you how easy it is to add pizzaz to your images!

Item# DVD-FX1 **$49.95**

It's Not Difficult!

Jacket Printing

With Scott Fresener

Jackets can be very profitable! Now you can quit turning down those jacket orders. If you already print jackets this video will help you minimize your mistakes and teach you how to do top quality work. Salvaging just one or two jackets could pay for this tape!

Topics include screen making and art requirements, nylon inks, multicolor prints, printing lined jackets, troubleshooting and more.

30 minutes

Item # DVD-JACKETS **$49.95**

Shirt Treatments

With Charlie Taublieb

If you like the "cooking shows" you will love this DVD. Charlie shows how to paint, roll, spray and use other methods to really give the shirt a "treatment."

Taught by industry veteran, Charlie Taublieb, you will see how easy it is to jazz up a shirt using simple methods.

30 Minutes

This is a fun DVD with lots of tips and tricks from an industry pro.

Item# DVD-SHIRT **$49.95**

Health and Safety in the Screening Shop

With Bob Alabaster

It's time to think about the health and safety of you and your employees in the screen printing shop AND complying with the law. This DVD covers all of the important points of both OSHA and EPA regulations and how you can come into compliance with regulations that effect your business.

This presentation was videotaped live at the U.S. Screen Printing Institute and features industry expert Bob Alabaster.

75 minutes

Item # DVD-HEALTH **$49.95**

Making Plastisol transfers.

Screen Printing Heat Transfers

Transfers are useful when you need to print more colors than your press allows, for "event" and concession work, and in other ventures where a large pre-printed inventory would be required and therefore prohibitive. This step-by-step video shows you how easy it is to make your own transfers!

Topics include hot and cold split transfers, sublimations, all about papers and inks, curing and drying, mesh and stencil systems, multi-color transfers, puff and foil, cap transfers, art requirements and much more. Featuring Scott Fresener and Bob Alabaster.

30 minutes

Item # DVD-HEAT TRANS **$49.95**

Note: This DVD does NOT cover digital computer generated inkjet transfers.

DVDs ARE COOL!

We are very excited about DVDs. Most new computers have a DVD player built in and DVD players for your TV are less than $100. With DVD, the quality you see is excellent because it is digital and you see exactly what we shoot. There is no image loss compared to video.

PLUS, if you watch the DVD on your computer, you can have the DVD training session running at the same time you are using a program. The best feature is there is no more rewinding or fast forwarding tape. Simply click on the "chapter" or "topic" you want and you are there in fractions of a second!!

Check our website often for new titles.

www.ScreenPrinters.Net

Please note that all of our DVDs are only produced in NTSC format (North American Standard) and are not produced in PAL format (many European countries). They will play on any computer in any country. They will NOT play on international DVD players that do not support multi-format or NTSC standard.

The easy way to learn at your own pace. Great for experienced printers and newcomers.

Class-In-A-Box

Learn at your own pace without having any travel expense. This course includes everything you need to learn how to screen print on garments AND make money doing it!

Just add equipment, a computer, shirts - and you are ready to go!

Over 20 hours of DVD training!

FastPROOF™

Now you can print a paper proof of ANY channel separation you create in Adobe Photoshop 5.5 or higher.

FastPROOF™ is a standalone program that works on both Windows or Mac operating systems. It lets you take any image that is color separated in "alpha channels" in Adobe Photoshop and print out a paper proof that includes color swatches, screen print detail and job information. In fact, you can even email the proof to the client.

This is the perfect way to include color swatches, a full-color image of the job and job information for the production department. They will thank you for this program!

Works great with FastFilms™ or any other channel separation program!

$199.00

Item # FASTPROOF

Get FastPROOF™ for only $125.00 with the purchase of FastFILMS™

FAST ART™

High Resolution Royalty Free Full-Color Images

$149.95 per CD

Purchase any three CD's for $425.00.
Ten for $995.00. Twentyfive for $2,295.00!

Simply mix-and-match, add text and separate!

Each FastArt™ CD contains high-resolution, royalty free, photographic quality images that can be used to create complete designs. Artists use them as building blocks. Non-artists use them to amaze their customers! Most images contain multiple layers with additional graphic elements that can be used in other designs. Take a layer from one image and simply drag it to another image. Use a background from one and a main object from another. Add a little text, give the text a shadow and you have Instant Design! Files are 150 to 200 dpi at T-Shirt size! Many files are 20 to 30 mb. Works great with FastFilms!

All designs are in Photoshop's PSD format. They work on both Mac and Windows platforms. Each CD also contains low resolution images for quick preview. Images work in Photoshop, Corel Draw, Freehand and Adobe Illustrator.

To view or download images go to www.ScreenPrinters.Net.

Hands-On Workshops Since 1979

Learn the right way.

Whether you are a beginner just starting a part-time business, or a seasoned professional needing to learn the latest techniques, the Institute's classes have something to offer. The U.S. Screen Print & Inkjet Institute has been teaching industry courses since 1979! Our classes are a true educational experience, designed to teach you what you need to know to get a successful start in the Garment Decorating Business.

About the Institute's workshops.

Classes are held in Tempe, Arizona (a suburb of Phoenix), in a modern and very well equipped workshop. Students benefit from actual hands-on experience with everything from manual printing presses, to flash-cure units, exposure units, and dryers, to washout sinks, inks, computer graphics, direct-to-garment printing machines and more. Classes are held monthly and fill up very rapidly. The Institute's headquarters hotel, the Holiday Inn of Tempe, offers a special rate to students and has free airport pickup and daily shuttle service to and from the class! And, Tempe is the home of Arizona State University with LOTS to do!

Professional Garment Printing Workshop

Class #GP101 3-Days $495.00 per person

Instructors: Scott Fresener, Mike Fresener, Terry Combs

Discounts are given when more than one person attends from the same company. Refer to the Class Discount Schedule.

About This Class

Are you thinking of starting a T-Shirt screen printing business? Are you sending out printing to a local screener and not getting the quality or service you need? Are you looking for a profitable part-time business? Are you a self-taught screener who wants to learn better ways to do things and get on top of the latest techniques and products?

If you answered yes to any of the above questions, then this class is for you! It is a professional, commercial class that teaches everything from A-Z about printing T-Shirts, and other printables. You will learn more in three days with USSPI than in years of "going it alone". Graduates of this course will be able to immediately set-up and run a garment printing business and do great one-color and multi-color work.

Partial Course Contents

INTRODUCTION
To get you started on the right foot you will be given an overview of the entire industry with a quick look at how much money you can make. You'll actually print a shirt in the first hour of class.

COMPUTER GRAPHICS
Art talent isn't a requirement. With tricks-of-the-trade you learn to take customers ideas and rough sketches and turn them into finished designs. Learn the basics of computer graphics (not hands-on) including overviews of programs like Corel Draw, Adobe Photoshop and Adobe Illustrator, proper scanning, using clip art, color separations, using halftone dots, how to use a laser or inkjet for film output, and much, much, more.

SCREEN MAKING
The screen is a critical part of the entire process. You'll learn about screen frames including wood, metal and retensionables. Also covered are screen fabrics, how to use a tension meter, mesh counts, and the correct screen mesh to use for light shirts, dark shirts, baseball caps, nylon jackets, heat transfers, foil and more.

You will actually make a screen and will learn about emulsions and stencil systems, screen reclaiming, storage, screen exposure (including simple methods like sunlight!), and more.

GARMENT PRINTING INKS
It is vital to understand how to use inks properly. You'll learn about plastisol ink, heat transfer inks, ink for jacket printing, PLUS you'll learn the most up-to-date information on specialty inks such as puff and glitter. This section also covers how to make inks work better, proper curing, using ink additives, and basic color matching.

EQUIPMENT
The classroom contains a variety of equipment from various industry manufacturers. Learn to discern between important features and what is just "window dressing."

You will have an opportunity to use all of the equipment in the classroom. If you have not made an equipment purchase yet it is advisable to wait until you come to class and get some HANDS-ON experience before you buy. Important note: The U.S. Screen Printing Institute DOES NOT sell screen printing equipment. If you are starting on a shoestring, or perhaps just want to try the business on a small scale first, we will provide plans for equipment that you can make yourself!

PRINTING TECHNIQUES
This section covers everything from setting up the press for one-color and multi-color jobs, to what type of squeegees to use, how to hold shirts in place, how to get good looking spot color prints on dark shirts, types of printing strokes, getting high production, flash curing for better prints, printing multi-color wet-on-wet and a lot more!

You will print a number of shirts in class including one-color, multi-color , puff prints and heat transfers - and Hanes provides the garments! Other topics include athletic printing, spot removal, clean-up, supply requirements and printing with blends.

HEAT TRANSFERS
Learn to make plastisol heat transfers, including hot and cold peel. This section covers inks, curing, transfer paper, multi-color transfers, cap transfers, artwork, and screen making requirements. You will also learn about computer generated sublimation dye transfers for garments, metal and mugs; and using foils on transfers. You will actually print and apply hot-split, cold-peel, and foil transfers in class.

OTHER PRINTABLES
You'll also learn about special techniques for items such as sweatshirts, caps, towels, socks, totes, aprons, patches, uniforms and NYLON JACKETS! Non-textile items such as signs, posters, containers, vinyl binders, and bumper stickers are also discussed.

MARKETING AND SELLING
An important section! This covers who the customer is, how to price your work competitively, making your own catalog, management, using generic catalogs, mailing lists, advertising, where to find customers and how to keep them!

GENERAL BUSINESS PRACTICE
Learn how to be a good business person, understanding "trade standards," dealing with employees and customers, giving and getting credit, industry trade magazines, trade shows and trade associations and how to keep up with the latest developments in the industry.

SETTING UP A SHOP
You'll receive a complete shopping list of equipment and supplies designed for different sized shops plus tips on working out of your home, renting a building, shop layout, zoning, safety considerations and more.

NEW TECHNOLOGY
You will also see a demonstration of the latest direct-to-garment inkjet technology.

Class Hours

The hours of this class are designed so participants can drive or fly in the morning of the first day and still get a full day of instruction.

1st Day 11:00 a.m. to 5:00 p.m.
2nd Day 9:00 a.m. to 5:00 p.m.
3rd Day 9:00 a.m. to 4:00 p.m.

Classes are held monthly. Call or check the internet for class dates and availability.

Classes taught by *Scott Fresener, Terry Combs, and Mike Fresener*

Class 101 uses a team approach to teaching. Scott Fresener teaches a majority of the class with specific sections taught by Terry Combs and Mike Fresener. Between the three instructors you get almost 80 years of combined experience from a well respected group of industry veterans.

Who Should Attend?

This class is of interest to all who are planning to start a garment printing business or who are involved in the management or artwork preparation areas of screen-printing.

It is also valuable to experienced printers wanting to learn good fundamentals and new techniques, sales people, business owners who want to know as much or more than their employees, and people who are dealing with outside screen printers now, and want to be able to deal with them better. It is highly recommended for people who sell screen-printing supplies and equipment, plus garment wholesalers who deal with screen printers.

Classes are held monthly. For class dates and additional information on these and other classes call 800-624-6532, (480)929-0640, or simply go to *www.ScreenPrinters.net/school*. *Email: class@usscreen.com*

Basic Fast T-Jet Printing Workshop

Class #TJ201 1-Day $195.00 per person

We've been the innovator in this new industry and have placed more machines in businesses around the world than all the other manufacturers combined. The T-Jet is the inkjet garment decorator's machine of choice worldwide. And our new **Professional T-Jet Garment Printing Workshop** will help you enter this new marketplace with the training and confidence necessary for success.

Partial Course Contents

Who Should Attend

Whether you're a new start up business, a seasoned screen printer or an embroiderer, and you own or are looking to own a Fast T-Jet, this is the course for you. This is also an ideal class for your employees who will be operating your T-Jet machine.

The Class

This one-day event will give you hands on experience with our classroom machines. You will be working with our table-top T-Jet2 and T-Jet3 inkjet-to-garment printers.

We'll start by teaching the basics of preparing artwork in FastARTIST and how to deal with you customer supplied artwork.

You will then learn how to setup a T-Jet printer and how to prepare the artwork files to be printed. You will learn all about the different settings for different garment types and how to pretreat dark shirts for printing with white ink.

One of the most important parts of the class is on machine maintenance and troubleshooting. Our lead maintenance and repair manager guides you through simple procedures to help you have a happy T-Jet.

The second half of the day is spend actually printing. Class sizes are kept to ten to twelve people with plenty of T-Jet printers and computer. The best part is the fact that during the hands-on portion we have at least five instructors giving a lot of one-on-one training. You can bring your own artwork or create images in the class.

Class Time

9:00 a.m.to 5:00 p.m.

Institute Registration and Information

PHONE REGISTRATION

Our classes are VERY popular. They generally fill up two or three weeks before the class date. We will gladly accept phone registrations. They are taken on a first come, first served basis. Registration can be made by phoning toll-free at 1/800- 624-6532 between the hours of 8:30 a.m. and 5:00 p.m. (mst) Monday through Friday. You can also fax your registration to (480)929-0766 or email class@usscreen.com.

VERIFY CLASS AVAILABILITY

Since the classes fill up rapidly, you should ALWAYS verify availability by phone or online first to make sure there is room in the class. Do not make travel arrangements until space availability has been verified.

REGISTRATION FEES

In order to guarantee your place in class, full payment must accompany your registration. Class reservations made without accompanying prepayment are not guaranteed and may be cancelled by the U.S. Screen Print & Inkjet Institute without notice to make room for daily prepaid reservations.

PAYMENT METHODS

We accept Visa, MasterCard, Discover Card, American Express, bank wire, and ACH check by phone. Personal and company checks are also accepted but must be presented at least ten days before the class start date.

If you sign-up months in advance for a class, it is only necessary to send a 50% deposit with the registration. Full class fees are due one month prior to the class start date.

Purchase orders are only accepted from institutions, insurance companies, rehabilitation centers, government agencies and major corporations.

REGISTRATION CONFIRMATION

Phone and online registrations will immediately be confirmed by letter or email outlining details about the school, the location, housing, transportation, what to bring, what to wear and what to expect.

LATE REGISTRATION

Although the classes always fill up, there are occasional last minute cancellations. We can also put you on a class waiting list in case the class is full. If you are a last minute registrant it may be necessary to "overnight" your payment to guarantee your place in class.

CANCELLATIONS AND REFUNDS

All advance payments are fully refundable until five days from the class date. After that time there is a $50 per person service charge for late cancellations. CLASS FEES WILL NOT BE REFUNDED FOR CANCELLATIONS MADE LESS THAN 48 HOURS BEFORE THE CLASS START TIME.

If for any reason a class is cancelled, students will be notified and full refunds sent.

GROUP OR TEAM DISCOUNT

In order to make the class more affordable for groups, teams, spouses or business partners we offer multiple student class discounts. Class fees and discounts are as follows:

Class Fee Schedule

Class	1 Person	2 People	3 People
GP101 - Basic Garment Printing	$495.00	$850.00	$1,275.00
TJ201 - Professional T-Jet Course	$195.00	$390.00	$585.00

HOTEL ACCOMMODATIONS

Hotel accommodations are not included in the class fees. Reservations should be made directly with the hotel as far in advance as possible. Students must tell the hotel they are attending the U.S. Screen Print & Inkjet Institute in order to get the special class discount. If you are arriving after 6:00 p.m. make sure to guarantee the room with prepayment or credit card. If for some reason the hotel does not have vacancies please call the school at once so alternate arrangements can be made.

THE OFFICIAL HOTEL IS:

Holiday Inn Tempe
915 E. Apache Blvd.
Tempe, Arizona 85281
Phone: 480-968-3451 Toll Free: 800-553-1826
Fax: 480-969-6262

We have negotiated a special rate with the Holiday Inn which includes shuttling you to and from the class. For less confusion, PLEASE call their local number of 480-968-3451 rather than the normal toll free reservation number. Remember, Phoenix/Tempe is a tourist area so book your room early. Other, less/more expensive hotels and motels are available. For additional hotel information call the Institute.

TRANSPORTATION

FREE shuttle service is only provided to the school from the Holiday Inn in Tempe. The Holiday Inn Tempe also provides free airport shuttle and they will drive you within a five mile radius for shopping.

TAX DEDUCTION

According to Treasury Regulation 1.162-5, registration fees, travel, meals, lodging, etc., are tax deductible as educational expenses if the instruction is TO MAINTAIN OR IMPROVE SKILLS necessary to employment or required by an employer or by law. If you HAVE NOT started your business prior to attending one of these classes it may NOT be possible to deduct these expenses. Consult your accountant or CPA for additional information.

CERTIFICATE OF COMPLETION

Every student receives a Certificate of Completion at the end of each class.

IT'S EASY TO LEARN

The U.S. Screen Print & Inkjet Institute uses an interactive approach to teaching. By combining audio-visuals, lecture, question and answers, problem solving, peer interaction, and hands-on sessions, the students of the Institute learn AND RETAIN a great amount of information in a short time period!

This approach coupled with a relaxed, casual teaching environment full of hundreds of samples, the latest equipment and a patient, professional instructor with years of actual field experience makes the total learning experience easy and enjoyable.

In fact the Institute provides free coffee, soda and snacks through-out the day for attendees.

Classes Held Monthly.
